PROFESSIONAL EXPERIENCE:

Freelance

Laravel Developer / March 2017 until that moment

- Developing interesting projects related with different topics. It's been used **Laravel** Framework as a tool for accomplishing that cause it's been required speed, beauty and productivity as aspects. It was something I've enjoyed considering technical aspect plus client perspective.
- Engaging in programming different tasks. Reading and performing tasks after other developers in order to make it work in reliable and optimized way.

Impro Group - trading company.

The company buys, sells, distributes and trades supplies and parts for copiers and printers.

Developer / August 2015 to December 2016 (one year and three months)

- Developing and updating business system for the company engaged basically buying and selling printer's cartridges
- Performed multitasking based on ticket system which has included tasks for the Back End, Front End and much work with database based on MS SQL system
- Also developed and maintained a few sites representing the products of the company

- Collaborated with team members in the development of database structuring

Toco Tour - travel company.

The company which is engaged in tourism. It serves its customers to relax in the best hotels of Turkey, Greece, Bulgaria and other countries.

Programmer / October 2014 to May 2015 (six months)

- Developed, maintained and supported application programs for administrative, Web systems using PHP, Smarty (web template system based on MVC), MySQL, JavaScript and related tools
- Developing the admin part of the purpose of that managers can make all manipulation to data. Basically They could add, update, or delete different data of the hotels, countries, tours, different options and criteria
